

CURBSIDE CRAFTS FROM THE
PROVIDENCE ATHENÆUM'S CHILDREN'S LIBRARY

HALLOWEEN LANTERN!

*It's time for a little witch-crafting!
Everyone will know that you are ready
for Halloween fun when you put this
spooky little lantern in your window!*

Supplies in kit

- pre-cut lantern form
- tissue square
- pre-cut disc
- sheet of star stickers
- little witch silhouette
- electric tea light

What you'll need from home

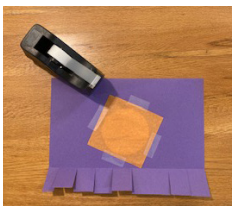

- scissors
- glue stick or school glue
- tape

Directions

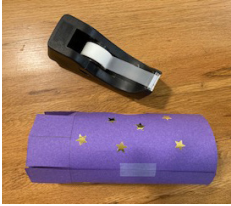

1. The lantern form has vertical cutting guides drawn on one side. With the lined side up, decorate the lantern with the gold stars ABOVE the vertical lines. Then snip the vertical lines, no further than the horizontal line.

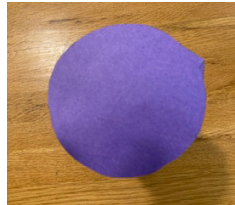

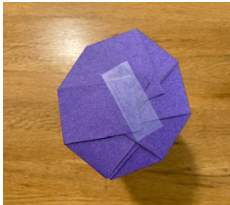

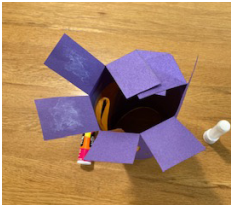

2. Flip the form over and tape/glue the tissue over the cutout hole as pictured. Glue the witch to the center of the tissue circle and add some glue to one edge of the lantern form.

3. Curve the two edges together so that the stars are on the outside. Press together to make a sturdy cylinder shape.

4. Turn the cylinder upside down and, using glue on each tab, fold and pinch them together. When you get to the last few tabs, you can set the cylinder upright, slide your hand inside the tube, and press together the rest of the tabs. A little tape on the bottom helps. Next, glue the disc to the bottom to help make a flat surface for the lantern to sit on.

5. Place the lit tealight inside and enjoy the witch-crafty glow!

BOOK RECOMMENDATIONS

The Little Leftover Witch by Florence Laughlin

Room on the Broom by Julia Donaldson

Only a Witch Can Fly by Alison McGhee

Which is the Witch by W.K. Jasner
