

CRAFT KITS FROM THE PROVIDENCE ATHENÆUM'S CHILDREN'S LIBRARY

A FLYING DRAGON!

It's March and that means windy days. This colorful dragon will work hard to catch the wind and show off its beautiful tail!

Supplies in kit

- 1 vented paper cup
- 2 each white dot, large black dot, and tiny black dot stickers
- 1 pair of dragon flame eyebrows
- 5 colored streamers
- 1 length of string

What you'll need from home

- glue stick or liquid school glue

Directions

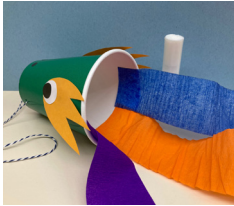

1. Thread each end of the string from the outside of the cup to the inside through the pre-cut holes. Pull each end through and evenly tie a knot at the end. Pull the string back up through the top of the cup to make a loop for hanging.

2. Glue the dragon flame eyebrows to the outside of the cup. Next add the large white dots, followed by the large black dots (for the eyes) to each flame, and finally add the two tiny black dots for the dragons' nostrils.

3. Glue each of the five streamers to the inside of the cup as pictured. When the glue has dried, you can take your flying dragon outside and hang it up somewhere where it will have room to catch some wind or even hold it by the string and spin around.

Special note: This dragon is not waterproof and that means it likes to stay inside on rainy days!
